

Digital Implant Dentistry: From Exam to Restoration

JOHN W GANNON, DDS • BRENT DESUTTER, DDS

Dr. John Gannon completed dental school at the University of California, San Francisco and went on to complete his residency training at the University of Miami. He maintains a full-time practice in the Dallas area with a focus on dental implants, wisdom teeth, nerve reconstruction, jaw and TMJ surgery.

Dr. Brent DeSutter graduated from the University of Texas Health Science Center - San Antonio Dental School in 2013 and completed a general practice residency at the VA Hospital in Portland, OR. In 2017 he started a private practice in East Dallas focusing on cosmetic and restorative implant dentistry.

Single unit implant restorations can be a fantastic option for a long-term esthetic solution. But often we rush into surgery without an understanding of what our final restoration will look like. Conventional treatment planning and analog models are helpful but have limitations. Using digital tools, we can plan our case with a better understanding of the potential surgical and restorative complications and can communicate this with our entire restorative team. With more efficient communication and better data, we can mitigate risk for both the surgeon and restorative dentist. The overall long term success and predictability is greatly improved with digital treatment planning focused on the final prosthetics.

Audience: Dentists, Assistants
AGD Code: 610/690
CE Hours: 6 technical and/or scientific
(three session course)
CE Verification provided

Learning Objectives:

- Review the factors and options that need to be considered when treatment planning an anterior single tooth replacement.
- Understand the surgical procedures, requirements, and complications that commonly occur with single tooth implant placement.
- Discuss how digital technology can be utilized as a tool for treatment planning and communication between dental professionals.
- Understand the need for clear communication with the entire restorative team during treatment planning, procedure, and post-operative phases.

**ONLINE REGISTRATION REQUIRED FOR THIS
THREE-SESSION VIRTUAL COURSE BY FEBRUARY 6.**

Register online at www.dcds.org/events. A link to each 6:30 p.m. session will be sent to your email address.
